Bachelor of Science in Humanities and Science (Course 21S)

This joint degree program ([http://catalog.mit.edu/degree-charts/humanities-science-course-21s](http://catalog.mit.edu/degree-charts/humanities-science-course-21s)) draws from both humanistic and scientific studies, providing students with a basic command of each mode of inquiry. One component is selected from the undergraduate degree curriculum of a science department ([http://catalog.mit.edu/schools/science](http://catalog.mit.edu/schools/science)), which is approved by a faculty member in the field. The other component consists of subjects in a humanities field, chosen by the student in consultation with an advisor from the appropriate humanities faculty. This arrangement yields a humanities program of considerable depth while allowing for continued serious commitment to a scientific interest. In most cases, a senior thesis or sequence of advanced seminars is also required.

Available humanities fields include:

- American Studies
- Ancient and Medieval Studies
- Anthropology
- Asian and Asian Diaspora Studies
- Comparative Media Studies
- Global Studies and Languages (in French, German, or Spanish)
- History
- Latin American and Latino/a Studies
- Literature
- Music
- Russian and Eurasian Studies
- Science, Technology, and Society
- Theater Arts
- Women's and Gender Studies
- Writing (Creative, Digital Media, or Science Writing)
