

ADMISSIONS

Regular Graduate Admissions

A regular graduate student is an individual who has been admitted to the Institute and who is registered for a program of advanced study and research leading to any of the post-baccalaureate degrees offered by MIT.

To be admitted as a regular graduate student, an applicant must normally have received a bachelor's degree or its equivalent from a college, university, or technical school of acceptable standing. Applicants are evaluated by the department in which they propose to register on the basis of their prior performance and professional promise. These are evidenced by academic records, letters of evaluation from individuals familiar with the applicant's capabilities, and any other pertinent data furnished by the applicant. While high academic achievement does not guarantee admission, such achievement, or other persuasive evidence of professional promise, is expected.

MIT's offer of admission may be withdrawn or rescinded if it is determined that an applicant accepted the simultaneous offer of admission of another college or university.

A student registered in a program of study leading to the simultaneous award of the bachelor's degree and master's degree must apply for graduate study and be registered as a graduate student for at least one academic term (not the summer session) of their program of study.

Some engineering departments require students seeking a doctoral degree to qualify first for a master's degree.

Undergraduate Requirements for Advanced Degrees

In addition to preparation in the specific field of interest, most departments require significant work in mathematics and the physical sciences, but some require as little as a year of college-level work in these disciplines. Requirements of individual departments are described in their chapters of this catalog. Students with minor deficiencies in preparation may be admitted for graduate study; however, deficiencies in prerequisite or general or professional subjects must be made up before the student can proceed with graduate work dependent on them.

Application Procedures

Students normally begin graduate study in September. However, in select departments, suitable programs can be arranged for students entering in June or February. Prospective applicants should check with individual departments about their dates for admission and matriculation. Application deadlines vary by department. Deadlines are noted on the graduate admission application.

All applicants are required to apply online. Each department or program has its own online application with specific instructions. Department websites and application instructions may be found on the MIT Graduate Admissions (<https://oge.mit.edu/graduate-admissions>) website.

Inquiries about specific application and testing requirements, deadlines, and notification of decision for admission should be addressed to the appropriate graduate department or program.
