The Singapore-MIT Alliance (SMA) (http://web.mit.edu/sma) is a global partnership in graduate education created by MIT, the National University of Singapore, and Nanyang Technological University. Setting a new standard for international collaboration in graduate research and education, the alliance educates young engineers to serve as leaders in a technologically advanced economy, and creates a cohort of students and faculty with creativity and entrepreneurial spirit.

All five SMA-2 programs—Advanced Materials for Micro- and Nano-Systems, Chemical and Pharmaceutical Engineering, Computational Engineering, Computational and Systems Biology, Manufacturing Systems and Technology—had their final intake of new dual master’s students. All five programs continue to have engagement with PhD students and active research programs.

For more information about SMA, contact the executive director, John C. Desforge, Room 8-407, 617-452-3014.
