Undergraduate Subjects

Introductory Biology
All five subjects cover the same core material, comprising about 50% of the course, while the remaining material is specialized for each version as described below. Core material includes fundamental principles of biochemistry, genetics, molecular biology, and cell biology. These topics address structure and regulation of genes, structure and synthesis of proteins, how these molecules are integrated into cells and how cells communicate with one another.

7.012 Introductory Biology
Prereq: None
U (Fall)
5-0-7 units. BIOLOGY
Credit cannot also be received for 7.013, 7.014, 7.015, 7.016, ES.7012, ES.7013

Explores into areas of current research in molecular and cell biology, immunology, neurobiology, human genetics, biochemistry, and evolution. Enrollment limited to seating capacity of classroom. Admittance may be controlled by lottery.

E. Lander, R. Weinberg

7.013 Introductory Biology
Prereq: None
U (Spring)
5-0-7 units. BIOLOGY
Credit cannot also be received for 7.012, 7.014, 7.015, 7.016, ES.7012, ES.7013

Genomic approaches to human biology, including neuroscience, development, immunology, tissue repair and stem cells, tissue engineering, and infectious and inherited diseases, including cancer. Enrollment limited to seating capacity of classroom. Admittance may be controlled by lottery.

A. Amon, H. Sive

7.014 Introductory Biology
U (Spring)
5-0-7 units. BIOLOGY
Credit cannot also be received for 7.012, 7.013, 7.015, 7.016, ES.7012, ES.7013

Studied the fundamental principles of biology and their application towards understanding the Earth as a dynamical system shaped by life. Focuses on molecular ecology in order to show how processes at the molecular level can illuminate macroscopic properties, including evolution and maintenance of biogeochemical cycles, and ecological interactions in ecosystems ranging from the ocean to the human gut. Includes quantitative analysis of population growth, community structure, competition, mutualism and predation; highlights their role in shaping the biosphere. Enrollment limited to seating capacity of classroom. Admittance may be controlled by lottery.

G. C. Walker, S. W. Chisholm, M. Polz

7.015 Introductory Biology
Prereq: High school course covering cellular and molecular biology, or permission of instructor
U (Fall)
5-0-7 units. BIOLOGY
Credit cannot also be received for 7.012, 7.013, 7.014, 7.016, ES.7012, ES.7013

Emphasizes the application of fundamental biological principles to modern, trending topics in biology. Specific modules focus on antibiotic resistance, the microbiome, biotechnology (e.g., genetically-modified organisms and CRISPR-based genome editing), personal genetics and genomics, neurodegenerative diseases, and metabolism (the science behind making wine, cheese, and natural product drugs). Includes discussion of the social and ethical issues surrounding modern biology. Limited to 60; admittance may be controlled by lottery.

M. Laub, J. K. Weng
7.016 Introductory Biology
Prereq: None
U (Fall)
5-0-7 units. BIOLOGY
Credit cannot also be received for 7.012, 7.013, 7.014, 7.015, ES.7012, ES.7013
Introduction to fundamental principles of biochemistry, molecular biology and genetics for understanding the functions of living systems. Covers examples of the use of chemical biology, the use of genetics in biological discovery, principles of cellular organization and communication, and engineering biological systems. In addition, includes 21st-century molecular genetics in understanding human health and therapeutic intervention. Enrollment limited to seating capacity of classroom. Admittance may be controlled by lottery.
B. Imperiali, A. Martin

7.05 General Biochemistry
Prereq: 5.12, Biology (GIR), or permission of instructor
U (Spring)
5-0-7 units. REST
Credit cannot also be received for 5.07[J], 20.507[J]
Contributions of biochemistry toward an understanding of the structure and functioning of organisms, tissues, and cells. Chemistry and functions of constituents of cells and tissues and the chemical and physical-chemical basis for the structures of nucleic acids, proteins, and carbohydrates. Basic enzymology and biochemical reaction mechanisms involved in macromolecular synthesis and degradation, signaling, transport, and movement. General metabolism of carbohydrates, fats, and nitrogen-containing materials such as amino acids, proteins, and related compounds.
M. Vander Heiden, M. Yaffe

7.02[J] Introduction to Experimental Biology and Communication
Same subject as 10.702[J]
Prereq: Biology (GIR)
U (Fall, Spring)
4-8-6 units. Institute LAB
Introduction to the experimental concepts and methods of molecular biology, biochemistry, and genetic analysis. Emphasis on experimental design, critical data analysis, and the development of written communications skills. 12 units may be applied to the General Institute Laboratory Requirement. Enrollment limited.
T. Baker, M. Gehring, K. D. Wittrup, O. Yilmaz, L. Boyer, K. D. Wittrup

7.03 Genetics
Prereq: Biology (GIR)
U (Fall, Spring)
4-0-8 units. REST
The principles of genetics with application to the study of biological function at the level of molecules, cells, and multicellular organisms, including humans. Structure and function of genes, chromosomes, and genomes. Biological variation resulting from recombination, mutation, and selection. Population genetics. Use of genetic methods to analyze protein function, gene regulation, and inherited disease.
P. Gupta, P. Reddien, M. Hemann, A. Regev

7.06 Cell Biology
Prereq: 7.03, 7.05
U (Fall, Spring)
4-0-8 units
Presents the biology of cells of higher organisms. Studies the structure, function, and biosynthesis of cellular membranes and organelles; cell growth and oncogenic transformation; transport, receptors, and cell signaling; the cytoskeleton, the extracellular matrix, and cell movements; cell division and cell cycle; functions of specialized cell types. Emphasizes the current molecular knowledge of cell biological processes as well as the genetic, biochemical, and other experimental approaches that resulted in these discoveries.
A. Martin, F. Solomon, I. Cheeseman, T. Schwartz

7.08[J] Biological Chemistry II
Same subject as 5.08[J]
Subject meets with 7.80
Prereq: 5.12; 5.07[J] or 7.05
U (Spring)
4-0-8 units
See description under subject 5.08[J].
E. Nolan, R. Raines
7.09 Quantitative and Computational Biology  
Prereq: 7.03, 7.05  
U (Spring)  
3-0-9 units  
Quantitative and computational analysis of biological systems at the molecular and cellular level. Includes models of biological processes across different time scales, from steady-state to kinetics of gene expression, circadian clock, cell growth, and evolutionary dynamics. Methods include physical, systems, and synthetic biology. Also covers second-generation sequencing technologies, and topics in computational analysis of genomes, including sequence alignment, motif finding, information theory and RNA secondary structure prediction.  
C. Burge, G. W. Li

7.102 Laboratory in Molecular Biology  
Prereq: None  
U (IAP)  
0-5-1 units. Partial Lab  
Introduces basic methods of experimental molecular biology. Specific experiments vary from year-to-year, but will focus on the molecular genetic characterization of fundamental biological processes. Biology GIR or Chemistry GIR recommended. Satisfies 6 units of Institute Laboratory credit. Limited to 24; admittance may be controlled by lottery.  
D. Kim

7.11 Biology Teaching  
Prereq: None  
U (Fall, Spring)  
Units arranged  
Can be repeated for credit.  
For qualified undergraduate students interested in gaining some experience in teaching. Laboratory, tutorial, or classroom teaching under the supervision of a faculty member. Students selected by interview.  
Consult Biology Education Office

7.18 Topics in Experimental Biology  
Subject meets with 7.19  
Prereq: 7.02[J], 7.06, and an approved research experience; or permission of instructor  
U (Fall, Spring)  
4-16-10 units  
Independent experimental study under the direction of a member of the Biology Department faculty. Allows students with a strong interest in independent research to fulfill the project laboratory requirement for the Biology Department Program in the context of a research laboratory at MIT. The research must be conducted on the MIT campus and be a continuation of a previous 12-unit UROP project or full-time work over the summer. Written and oral presentation of the research results is required. Journal club discussions are used to help students evaluate and write scientific papers. Instruction and practice in written and oral communication is provided. Permission of the faculty research supervisor and the Biology Education Office must be obtained in advance.  
J. Chen, A. J. Sinskey, C. Kaiser

7.19 Communication in Experimental Biology  
Subject meets with 7.18  
Prereq: 7.02[J], 7.06; or permission of instructor  
U (Fall, Spring)  
4-4-4 units  
Students carry out independent literature research. Meets with the seminar and writing tutorial portions of 7.18. Journal club discussions are used to help students evaluate and write scientific papers. Instruction and practice in written and oral communication is provided. Permission of the instructor and the Biology Education Office must be obtained in advance.  
J. Chen, A. J. Sinskey, C. Kaiser

7.20[J] Human Physiology  
Same subject as HST.540[J]  
Prereq: 7.05  
U (Fall)  
5-0-7 units  
Comprehensive exploration of human physiology, emphasizing the molecular basis and applied aspects of organ function and regulation in health and disease. Includes a review of cell structure and function, as well as the mechanisms by which the endocrine and nervous systems integrate cellular metabolism. Special emphasis on examining the cardiovascular, pulmonary, gastrointestinal, and renal systems, as well as liver function, drug metabolism, and pharmacogenetics.  
M. Krieger, D. Sabatini
7.21 Microbial Physiology
Subject meets with 7.62
Prereq: 7.03, 7.05
U (Fall)
4-0-8 units
Biochemical properties of bacteria and other microorganisms that enable them to grow under a variety of conditions. Interaction between bacteria and bacteriophages. Genetic and metabolic regulation of enzyme action and enzyme formation. Structure and function of components of the bacterial cell envelope. Protein secretion with a special emphasis on its various roles in pathogenesis. Additional topics include bioenergetics, symbiosis, quorum sensing, global responses to DNA damage, and biofilms. Students taking the graduate version are expected to explore the subject in greater depth.

G. C. Walker, A. J. Sinskey

7.22 Developmental Biology
Prereq: 7.06
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: U (Fall)
5-0-7 units
Topics include development of animal body plans, tissue patterning, cell type determination, organogenesis, morphogenesis, stem cells, and the evolution of developmental diversity and processes. Covers experimental approaches to problems of development and evolution, such as the study of vertebrate (mouse, chick, frog, fish) and invertebrate (fly, worm) models.

R. O. Hynes, P. Reddien

7.23 Immunology
Subject meets with 7.63
Prereq: 7.06
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: U (Fall)
5-0-7 units
Comprehensive survey of molecular, genetic, and cellular aspects of the immune system. Topics include innate and adaptive immunity; cells and organs of the immune system; immunoglobulin, T cell receptor, and major histocompatibility complex (MHC) proteins and genes; development and functions of B and T lymphocytes; immune responses to infections and tumors; hypersensitivity, autoimmunity, and immunodeficiencies. Particular attention to the development and function of the immune system as a whole, as studied by modern methods and techniques. Students taking the graduate version are expected to explore the subject in greater depth.

Staff

7.26 Molecular Basis of Infectious Disease
Subject meets with 7.66
Prereq: 7.06
U (Spring)
4-0-8 units
Focuses on the principles of host-pathogen interactions with an emphasis on infectious diseases of humans. Presents key concepts of pathogenesis through the study of various human pathogens. Includes critical analysis and discussion of assigned readings. Students taking the graduate version are expected to explore the subject in greater depth.

D. Kim

7.27 Principles of Human Disease
Prereq: 7.06
U (Spring)
4-0-8 units
Covers current understanding of and modern approaches to human disease, emphasizing the molecular and cellular basis of both genetic disease and cancer. Topics include the genetics of simple and complex traits; karyotypic analysis and positional cloning; genetic diagnosis; the roles of oncogenes and tumor suppressors in tumor initiation, progression, and treatment; the interaction between genetics and environment; animal models of human disease; cancer; aging and disease; and conventional and gene therapy treatment strategies.

D. Housman, L. Guarente

7.28 Molecular Biology
Subject meets with 7.58
Prereq: 7.03; Coreq: 7.05
U (Spring)
5-0-7 units
Detailed analysis of the biochemical mechanisms that control the maintenance, expression, and evolution of prokaryotic and eukaryotic genomes. Topics covered in lecture and readings of relevant literature include: gene regulation, DNA replication, genetic recombination, and mRNA translation. Logic of experimental design and data analysis emphasized. Presentations include both lectures and group discussions of representative papers from the literature. Students taking the graduate version are expected to explore the subject in greater depth.

U. RajBhandary, E. Calo
7.29[J] Cellular and Molecular Neurobiology
Same subject as 9.09[J]
Prereq: 7.05 or 9.01
U (Spring)
4-0-8 units
Introduction to the structure and function of the nervous system. Emphasizes the cellular properties of neurons and other excitable cells. Includes the structure and biophysical properties of excitable cells, synaptic transmission, neurochemistry, neurodevelopment, integration of information in simple systems, and detection and information coding during sensory transduction.
T. Littleton, M. Wilson

Same subject as 1.018A[J], 12.031A[J]
Prereq: None
U (Fall; first half of term)
2-0-4 units
See description under subject 1.018A[J].
O. Cordero, M. Follows

Same subject as 1.018B[J], 12.031B[J]
Prereq: 1.018A[J]
U (Fall; second half of term)
2-0-4 units
See description under subject 1.018B[J].
O. Cordero, M. Follows

7.31 Current Topics in Mammalian Biology: Medical Implications
Prereq: 7.06 or permission of instructor
U (Fall)
4-0-8 units
Covers recent advances in mammalian cell and developmental biology with particular emphasis on approaches that utilize mouse genetics. Combines formal lectures on selected topics with readings of original papers which are discussed in class. Major emphasis on the implications of mechanisms of human genetic diseases. Topics include early mammalian development; genomic imprinting; X inactivation; embryonic stem cells; nuclear reprogramming of somatic cells; cell migration; nervous system development; and central nervous system degenerative diseases such as Alzheimer's and Huntington's disease. Limited to 20.
F. Gertler, R. Jaenisch

7.32 Systems Biology
Subject meets with 7.81[J], 8.591[J]
Prereq: 18.03, 18.05; or permission of instructor
U (Fall)
3-0-9 units
Introduction to cellular and population-level systems biology with an emphasis on synthetic biology, modeling of genetic networks, cell-cell interactions, and evolutionary dynamics. Cellular systems include genetic switches and oscillators, network motifs, genetic network evolution, and cellular decision-making. Population-level systems include models of pattern formation, cell-cell communications, and evolutionary systems biology. Students taking graduate version explore the subject in more depth.
J. Gore

Same subject as 6.049[J]
Prereq: 7.03; 6.0001 or permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: U (Spring)
3-0-9 units
Explores and illustrates how evolution explains biology, with an emphasis on computational model building for analyzing evolutionary data. Covers key concepts of biological evolution, including adaptive evolution, neutral evolution, evolution of sex, genomic conflict, speciation, phylogeny and comparative methods, life's history, coevolution, human evolution, and evolution of disease.
R. Berwick, D. Bartel

7.331[J] Infections and Inequalities: Interdisciplinary Perspectives on Global Health
Same subject as 21A.331[J], HST.431[J]
Prereq: None
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: U (Spring)
3-0-9 units. HASS-S
See description under subject 21A.331[J]. Limited to 25.
E. James, D. Kim, A. Chakraborty
7.340-7.344 Advanced Undergraduate Seminar
Prereq: 7.06 or 7.28
U (Fall, Spring)
2-0-4 units
Can be repeated for credit.

Seminars covering topics of current interest in biology with a focus on how to understand experimental methods and design and how to critically read the primary research literature. Small class size facilitates discussions and interactions with an active research scientist. Students visit research laboratories to see firsthand how biological research is conducted. Contact Biology Education Office for topics.

H. R. Horvitz

7.345-7.349 Advanced Undergraduate Seminar
Prereq: 7.06 or 7.28
U (Fall, Spring)
2-0-4 units
Can be repeated for credit.

Seminars covering topics of current interest in biology with a focus on how to understand experimental methods and design and how to critically read the primary research literature. Small class size facilitates discussions and interactions with an active research scientist. Students visit research laboratories to see firsthand how biological research is conducted. Contact Biology Education Office for topics.

H. R. Horvitz

7.37[J] Molecular and Engineering Aspects of Biotechnology
Same subject as 10.441[J], 20.361[J]
Prereq: 2.005, 3.012, 5.60, or 20.110[J]; 7.06; or permission of instructor
U (Spring)
Not offered regularly; consult department
4-0-8 units
Credit cannot also be received for 7.371

Covers biological and bioengineering principles underlying the development and therapeutic use of recombinant proteins and stem cells; glycoengineering of recombinant proteins; normal and pathological signaling by growth factors and their receptors; receptor trafficking; monoclonal antibodies as therapeutics; protein pharmacology and delivery; stem cell-derived tissues as therapeutics; RNA therapeutics; combinatorial protein engineering; and new antitumor drugs.

H. Lodish, L. Griffith

7.371 Biological and Engineering Principles Underlying Novel Biotherapeutics
Prereq: 7.06
U (Fall)
4-0-8 units
Credit cannot also be received for 7.37[J], 10.441[J], 20.361[J]

Covers biological and bioengineering principles underlying the development and therapeutic use of recombinant proteins and immune cells. Special attention to monoclonal antibodies and engineered immune system cells as therapeutics; protein- and glyco- engineering to enhance protein function; protein pharmacology and delivery; nucleic acid- based biotherapeutics; generation of functional cells and tissues from embryonic stem cells and iPS cells; and immune cell-cancer cell interactions in cancer immunotherapy.

J. Chen, H. Lodish

7.41 Principles of Chemical Biology
Subject meets with 7.73
Prereq: 7.05
U (Spring)
3-0-9 units

Spanning the fields of biology, chemistry and engineering, class addresses the principles of chemical biology and its application of chemical and physical methods and reagents to the study and manipulation of biological systems. Topics include bioorthogonal reactions and activity-based protein profiling, small molecule inhibitors and chemical genetics, fluorescent probes for biological studies, and unnatural amino acid mutagenesis. Also covers chemical biology approaches for studying dynamic post-translational modification reactions, natural product biosynthesis and mutasynthesis, and high-throughput drug screening. Students taking the graduate version are expected to explore the subject in greater depth.

B. Imperiali, J. K. Weng

7.45 The Hallmarks of Cancer
Subject meets with 7.85
Prereq: None. Coreq: 7.06
U (Fall)
4-0-8 units

Provides a comprehensive introduction to the fundamentals of cancer biology and cancer treatment. Topics include cancer genetics, genomics, and epigenetics; familial cancer syndromes; signal transduction, cell cycle control, and apoptosis; cancer metabolism; stem cells and cancer; metastasis; cancer immunology and immunotherapy; conventional and molecularly-targeted therapies; and early detection and prevention. Students taking graduate version complete additional assignments.

T. Jacks, M. Vander Heiden
7.458[J] Advances in Biomanufacturing
Same subject as 10.03[J]
Subject meets with 7.548[J], 10.53[J]
Prereq: None
U (Spring; second half of term)
1-0-2 units

Seminar examines how biopharmaceuticals, an increasingly important class of pharmaceuticals, are manufactured. Topics range from fundamental bioprocesses to new technologies to the economics of biomanufacturing. Also covers the impact of globalization on regulation and quality approaches as well as supply chain integrity. Students taking graduate version complete additional assignments.

J. C. Love, A. Sinskey, S. Springs

7.49[J] Developmental Neurobiology
Same subject as 9.18[J]
Subject meets with 7.69[J], 9.181[J]
Prereq: 9.01, 7.03, 7.05, or permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: U (Spring)
3-0-9 units

Considers molecular control of neural specification, formation of neuronal connections, construction of neural systems, and the contributions of experience to shaping brain structure and function. Topics include: neural induction and pattern formation, cell lineage and fate determination, neuronal migration, axon guidance, synapse formation and stabilization, activity-dependent development and critical periods, development of behavior. Students taking graduate version complete additional readings that will be addressed in their mid-term and final exams.

E. Nedivi, M. Heiman

7.392 Independent Study in Biology
Prereq: None
U (Fall, Spring)
Units arranged
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.393 Independent Study in Genetics
Prereq: None
U (Fall, Spring)
Units arranged
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.394 Independent Study in Biochemistry
Prereq: None
U (Fall, Spring)
Units arranged
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.395 Independent Study in Cell and Molecular Biology
Prereq: None
U (Fall, Spring)
Units arranged
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.396 Independent Study in Experimental Biology
Prereq: None
U (Fall, IAP, Spring)
Units arranged [P/D/F]
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff
BIOLOGY (COURSE 7)

7.S391 Special Subject in Biology  
Prereq: Permission of instructor  
U (Fall, Spring, Summer)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Covers material in various fields of biology not offered by the regular subjects of instruction.  
Staff

7.S392 Special Subject in Biology  
Prereq: Permission of instructor  
U (Fall, IAP, Spring)  
Not offered regularly; consult department  
Units arranged [P/D/F]  
Can be repeated for credit.  
Covers material in various fields of biology not offered by the regular subjects of instruction.  
Staff

7.S399 Special Subject in Biology  
Prereq: Permission of instructor  
U (Fall, IAP, Spring)  
Not offered regularly; consult department  
Units arranged  
Can be repeated for credit.  
Covers material in various fields of biology not offered by the regular subjects of instruction.

Graduate Subjects

MIT-WHOI Joint Program in Oceanography

7.410 Applied Statistics  
Prereq: Permission of instructor  
G (Spring)  
3-o-9 units  
Can be repeated for credit.  
Provides an introduction to modern applied statistics. Topics include likelihood-based methods for estimation, confidence intervals, and hypothesis-testing; bootstrapping; time series modeling; linear models; nonparametric regression; and model selection. Organized around examples drawn from the recent literature.  
A. Solow

7.411 Seminars in Biological Oceanography  
Prereq: Permission of instructor  
G (Fall, Spring)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Selected topics in biological oceanography.  
WHOI Staff

7.421 Problems in Biological Oceanography  
Prereq: Permission of instructor  
G (Fall, Spring)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Advanced problems in biological oceanography with assigned reading and consultation.  
Information: M. Neubert (WHOI)

7.430 Topics in Quantitative Marine Science  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-o-4 units  
Can be repeated for credit.  
Lectures and discussions on quantitative marine ecology. Topics vary from year to year.  
WHOI Staff
7.431 Topics in Marine Ecology  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussions on ecological principles and processes in marine populations, communities, and ecosystems. Topics vary from year to year.  
*WHOI Staff*

7.432 Topics in Marine Physiology and Biochemistry  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussions on physiological and biochemical processes in marine organisms. Topics vary from year to year.  
*WHOI Staff*

7.433 Topics in Biological Oceanography  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussions on biological oceanography. Topics vary from year to year.  
*WHOI Staff*

7.434 Topics in Zooplankton Biology  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussions on the biology of marine zooplankton. Topics vary from year to year.  
*WHOI Staff*

7.435 Topics in Benthic Biology  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussions on the biology of marine benthos. Topics vary from year to year.  
*WHOI Staff*

7.436 Topics in Phytoplankton Biology  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussion on the biology of marine phytoplankton. Topics vary from year to year.  
*WHOI Staff*

7.437 Topics in Molecular Biological Oceanography  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussion on molecular biological oceanography. Topics vary from year to year.  
*WHOI Staff*

7.438 Topics in the Behavior of Marine Animals  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussion on the behavioral biology of marine animals. Topics vary from year to year.  
*WHOI Staff*

7.439 Topics in Marine Microbiology  
Prereq: Permission of instructor  
G (Fall, Spring)  
2-0-4 units  
Can be repeated for credit.  

Lectures and discussion on the biology of marine prokaryotes. Topics vary from year to year.  
*WHOI Staff*

7.440 An Introduction to Mathematical Ecology  
Prereq: Calculus I (GIR), 7.30B[J], or permission of instructor  
Acad Year 2017-2018: Not offered  
Acad Year 2018-2019: G (Spring)  
3-0-9 units  

Covers the basic models of population growth, demography, population interaction (competition, predation, mutualism), food webs, harvesting, and infectious disease, and the mathematical tools required for their analysis. Because these tools are also basic to the analysis of models in biochemistry, physiology, and behavior, subject also broadly relevant to students whose interests are not limited to ecological problems.  
*M. Neubert, H. Caswell (WHOI)*
**7.470 Biological Oceanography**  
Prereq: Permission of instructor  
G (Spring)  
3-0-9 units  
Intended for students with advanced training in biology. Intensive overview of biological oceanography. Major paradigms discussed, and dependence of biological processes in the ocean on physical and chemical aspects of the environment examined. Surveys the diversity of marine habitats, major groups of taxa inhabiting those habitats, and the general biology of the various taxa: the production and consumption of organic material in the ocean, as well as factors controlling those processes. Species diversity, structure of marine food webs, and the flow of energy within different marine habitats are detailed and contrasted.  
*WHOI Staff*

**7.491 Research in Biological Oceanography**  
Prereq: Permission of instructor  
G (Fall, Spring, Summer)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Directed research in biological oceanography not leading to graduate thesis and initiated prior to the qualifying exam.  
*WHOI Staff*

**Microbiology (MICRO)**

**7.492[J] Methods and Problems in Microbiology**  
Same subject as 1.86[J], 20.445[J]  
Prereq: None  
G (Fall)  
3-0-9 units  
Students will read and discuss primary literature covering key areas of microbial research with emphasis on methods and approaches used to understand and manipulate microbes. Preference to first-year Microbiology and Biology students.  
*M. Laub*

**7.493[J] Microbial Genetics and Evolution**  
Same subject as 1.87[J], 12.493[J], 20.446[J]  
Prereq: 7.03, 7.05, or permission of instructor  
G (Fall)  
4-0-8 units  
Covers aspects of microbial genetic and genomic analyses, central dogma, horizontal gene transfer, and evolution.  
*A. D. Grossman, E. Alm*

**7.494 Research Problems in Microbiology**  
Prereq: Permission of instructor  
G (Fall, Spring, Summer)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Directed research in the fields of microbial science and engineering.  
*Staff*

**7.498 Teaching Experience in Microbiology**  
Prereq: Permission of instructor  
G (Fall, Spring)  
Units arranged [P/D/F]  
Can be repeated for credit.  
For qualified graduate students in the Microbiology graduate program interested in teaching. Classroom or laboratory teaching under the supervision of a faculty member.  
*Staff*

**7.499 Research Rotations in Microbiology**  
Prereq: Permission of instructor; Coreq: 7.492[J], or 7.493[J]  
G (Fall, Spring)  
Units arranged [P/D/F]  
Can be repeated for credit.  
Introduces students to faculty participating in the interdepartmental Microbiology graduate program through a series of three lab rotations, which provide broad exposure to microbiology research at MIT. Students select a lab for thesis research by the end of their first year. Given the interdisciplinary nature of the program and the many research programs available, students may be able to work jointly with more than one research supervisor. Limited to students in the Microbiology graduate program.  
*Staff*

**7.MTHG Microbiology Graduate Thesis**  
Prereq: Permission of instructor  
G (Fall, IAP, Spring, Summer)  
Units arranged  
Can be repeated for credit.  
Program of research leading to the writing of a PhD thesis. To be arranged by the student and the appropriate MIT faculty member.  
*Staff*
Biology

7.50 Method and Logic in Molecular Biology
Prereq: Permission of instructor or Coreq: 7.51, 7.52
G (Fall)
4-0-8 units
Logic, experimental design and methods in biology, using discussions of the primary literature to discern the principles of biological investigation in making discoveries and testing hypotheses. In collaboration with faculty, students also apply those principles to generate a potential research project, presented in both written and oral form. Limited to Course 7 graduate students.

Staff

7.51 Principles of Biochemical Analysis
Prereq: Permission of instructor
G (Fall)
6-0-6 units
Principles of biochemistry, emphasizing structure, equilibrium studies, kinetics, informatics, single-molecule studies, and experimental design. Topics include macromolecular binding and specificity, protein folding and unfolding, allosteric systems, transcription factors, kinases, membrane channels and transporters, and molecular machines.
A. Keating, R. T. Sauer

7.52 Genetics for Graduate Students
Prereq: Permission of instructor
G (Fall)
4-0-8 units
Principles and approaches of genetic analysis, including Mendelian inheritance and prokaryotic genetics, yeast genetics, developmental genetics, neurogenetics, and human genetics.
A. Amon, D. Housman, H. R. Horvitz

7.540[J] Frontiers in Chemical Biology
Same subject as 5.54[J], 20.554[J]
Prereq: 5.13, 5.07[J], 7.06, permission of instructor
G (Fall)
2-0-4 units
See description under subject 5.54[J].
L. Kiessling

7.546[J] Science and Business of Biotechnology (New)
Same subject as 15.480[J], 20.586[J]
Prereq: Permission of instructor; Coreq: 15.401
G (Spring)
3-0-6 units
See description under subject 15.480[J].
A. Lo, H. Lodish

7.547[J] Principles and Practice of Drug Development
Same subject as 10.547[J], 15.136[J], HST.920[J], IDS.620[J]
Prereq: Permission of instructor
G (Fall)
3-0-6 units
See description under subject 15.136[J].
T. J. Allen, C. L. Cooney, S. N. Finkelstein, A. J. Sinskey, G. K. Raju

7.548[J] Advances in Biomanufacturing
Same subject as 10.53[J]
Subject meets with 7.458[J], 10.03[J]
Prereq: None
G (Spring; second half of term)
1-0-2 units
Seminar examines how biopharmaceuticals, an increasingly important class of pharmaceuticals, are manufactured. Topics range from fundamental bioprocesses to new technologies to the economics of biomanufacturing. Also covers the impact of globalization on regulation and quality approaches as well as supply chain integrity. Students taking graduate version complete additional assignments.
J. C. Love, A. Sinskey, S. Springs

7.549[J] Case Studies and Strategies in Drug Discovery and Development
Same subject as 15.137[J], 20.486[J], HST.916[J]
Prereq: None
G (Spring)
2-0-4 units
See description under subject 20.486[J].
S. R. Tannenbaum, A. J. Sinskey, A. W. Wood
**7.55 Case Studies in Modern Experimental Design**  
Prereq: Permission of instructor  
G (Spring)  
2-0-7 units  
Focuses on enhancing students' ability to analyze, design and present experiments, emphasizing modern techniques. Class discussions begin with papers that developed or utilized contemporary approaches (e.g., quantitative microscopy, biophysical and molecular genetic methods) to address important problems in biology. Each student prepares one specific aim of a standard research proposal for a project that emphasizes research strategy, experimental design, and writing.  
*L. Guarente, F. Solomon*

---

**7.57 Quantitative Biology for Graduate Students**  
Prereq: Permission of instructor  
G (Spring)  
4-0-8 units  
Introduces the fundamental concepts and tools of quantitative approaches to molecular and cellular biology. Covers a wide range of mathematical, computational, and statistical methods, although no previous expertise in these areas is required. Focuses on understanding quantitative approaches through the analysis of particular problems and examples drawn from classical genetics, molecular biology, cell biology, genomics, and systems biology.  
*P. Gupta, A. Regev, G. W. Li*

---

**7.58 Molecular Biology**  
Subject meets with 7.28  
Prereq: 7.03, 7.05, permission of instructor  
G (Spring)  
5-0-7 units  
Detailed analysis of the biochemical mechanisms that control the maintenance, expression, and evolution of prokaryotic and eukaryotic genomes. Topics covered in lecture and readings of relevant literature include: gene regulation, DNA replication, genetic recombination, and mRNA translation. Logic of experimental design and data analysis emphasized. Presentations include both lectures and group discussions of representative papers from the literature. Students taking the graduate version are expected to explore the subject in greater depth.  
*U. RajBhandary, E. Calo*

---

**7.59[J] Teaching College-Level Science and Engineering**  
Same subject as 1.95[J], 5.95[J], 8.395[J], 18.094[J]  
Subject meets with 2.978  
Prereq: None  
G (Fall)  
2-0-2 units  
See description under subject 5.95[J].  
*J. Rankin*

---

**7.60 Cell Biology: Structure and Functions of the Nucleus**  
Prereq: 7.06 or permission of instructor  
G (Spring)  
4-0-8 units  
Eukaryotic genome structure, function, and expression, processing of RNA, and regulation of the cell cycle. Emphasis on the techniques and logic used to address important problems in nuclear cell biology. Lectures on broad topic areas in nuclear cell biology and discussions on representative recent papers.  
*R. Young, L. Boyer*

---

**7.61 Eukaryotic Cell Biology: Principles and Practice**  
Prereq: Permission of instructor  
G (Fall)  
4-0-8 units  
Emphasizes methods and logic used to analyze structure and function of eukaryotic cells in diverse systems (e.g., yeast, fly, worm, mouse, human; development, stem cells, neurons). Combines lectures and in-depth roundtable discussions of literature readings with the active participation of faculty experts. Focuses on membranes (structure, function, traffic), organelles, the cell surface, signal transduction, cytoskeleton, cell motility and extracellular matrix. Ranges from basic studies to applications to human disease, while stressing critical analysis of experimental approaches. Enrollment limited.  
*M. Krieger*
7.62 Microbial Physiology
Subject meets with 7.21
Prereq: 7.03, 7.05, permission of instructor
G (Fall)
4-0-8 units

Biochemical properties of bacteria and other microorganisms that enable them to grow under a variety of conditions. Interaction between bacteria and bacteriophages. Genetic and metabolic regulation of enzyme action and enzyme formation. Structure and function of components of the bacterial cell envelope. Protein secretion with a special emphasis on its various roles in pathogenesis. Additional topics include bioenergetics, symbiosis, quorum sensing, global responses to DNA damage, and biofilms. Students taking the graduate version are expected to explore the subject in greater depth.

G. C. Walker, A. J. Sinskey

7.63 Immunology
Subject meets with 7.23
Prereq: 7.06, permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: G (Fall)
5-0-7 units

Comprehensive survey of molecular, genetic, and cellular aspects of the immune system. Topics include innate and adaptive immunity; cells and organs of the immune system; immunoglobulin, T cell receptor, and major histocompatibility complex (MHC) proteins and genes; development and functions of B and T lymphocytes; immune responses to infections and tumors; hypersensitivity, autoimmunity, and immunodeficiencies. Particular attention to the development and function of the immune system as a whole, as studied by modern methods and techniques. Students taking the graduate version are expected to explore the subject in greater depth.

Staff

7.64 Molecular Mechanisms, Pathology and Therapy of Human Neuromuscular Disorders
Prereq: Permission of instructor
G (Spring)
3-0-9 units

Investigates the molecular and clinical basis of central nervous system and neuromuscular disorders with particular emphasis on strategies for therapeutic intervention. Considers the in-depth analysis of clinical features, pathological mechanisms, and responses to current therapeutic interventions. Covers neurodegenerative diseases, such as Huntington’s disease, Parkinson’s disease, Alzheimer’s disease, Amyotrophic Lateral Sclerosis, Frontal Temporal Dementia, and neuromuscular disorders, such as Myotonic Dystrophy, Facio Scapular Humoral Dystrophy, and Duchenne Muscular Dystrophy.

D. Housman

7.65[J] Molecular and Cellular Neuroscience Core I
Same subject as 9.015[J]
Prereq: None
G (Fall)
3-0-9 units

See description under subject 9.015[J].

J. T. Littleton, F. Gertler

7.66 Molecular Basis of Infectious Disease
Subject meets with 7.26
Prereq: 7.06, permission of instructor
G (Spring)
4-0-8 units

Focuses on the principles of host-pathogen interactions with an emphasis on infectious diseases of humans. Presents key concepts of pathogenesis through the study of various human pathogens. Includes critical analysis and discussion of assigned readings. Students taking the graduate version are expected to explore the subject in greater depth.

D. Kim

7.67[J] Genetic Methods in Neurobiology
Same subject as 9.322[J]
Prereq: Permission of instructor
G (Spring)
Not offered regularly; consult department
3-0-6 units

See description under subject 9.322[J].

W. G. Quinn
7.68[J] Molecular and Cellular Neuroscience Core II
Same subject as 9.013[J]
Prereq: Permission of instructor
G (Spring)
3-0-9 units

See description under subject 9.013[J].
G. Feng, L.-H. Tsai

7.69[J] Developmental Neurobiology
Same subject as 9.181[J]
Subject meets with 7.49[J], 9.18[J]
Prereq: 9.011 or permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: G (Spring)
3-0-9 units

See description under subject 9.181[J].
E. Nedivi, M. Heiman

7.70 Regulation of Gene Expression
Prereq: Permission of instructor
G (Spring)
Not offered regularly; consult department
4-0-8 units

Seminar examines basic principles of biological regulation of gene expression. Focuses on examples that underpin these principles, as well as those that challenge certain long-held views. Topics covered may include the role of transcription factors, enhancers, DNA modifications, non-coding RNAs, and chromatin structure in the regulation of gene expression and mechanisms for epigenetic inheritance of transcriptional states. Limited to 40.
Staff

7.71 Structural and Biophysical Analysis of Biological Macromolecules
Subject meets with 5.78
Prereq: 5.13; 5.60; 5.07[I] or 7.05; permission of instructor.
G (Spring)
5-0-7 units

Studies theory and practice of 3-D analysis of macromolecules, using X-ray crystallography and EM analysis. Covers biophysical methods to characterize molecular properties and interactions. Includes discussion of current literature and, importantly, practical exercises in crystallization, model building, and the use of shared instrumentation available at MIT. Meets with 5.78 when offered concurrently.
C. Drennan, T. Schwartz

7.72 Principles and Frontiers of Developmental Biology
Prereq: Permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: G (Fall)
4-0-8 units

Covers fundamental principles and frontiers of animal development. Focuses on molecular mechanisms, experimental approaches, evolutionary context, human disorders, and topics of societal importance. Compares vertebrate (mouse, chick, frog, fish) and invertebrate (fly, worm) models. Modules include patterning and asymmetry of the body plan, cell type determination and diversity, organogenesis, morphogenesis, maternal control, organismal growth, stem cells, tissue engineering, and issues in human development.
H. Sive, T. Orr-Weaver

7.73 Principles of Chemical Biology
Subject meets with 7.41
Prereq: 7.05; Permission of instructor
G (Spring)
3-0-9 units

Spanning the fields of biology, chemistry and engineering, class addresses the principles of chemical biology and its application of chemical and physical methods and reagents to the study and manipulation of biological systems. Topics include bioorthogonal reactions and activity-based protein profiling, small molecule inhibitors and chemical genetics, fluorescent probes for biological studies, and unnatural amino acid mutagenesis. Also covers chemical biology approaches for studying dynamic post-translational modification reactions, natural product biosynthesis and mutasynthesis, and high-throughput drug screening. Students taking the graduate version are expected to explore the subject in greater depth.
B. Imperiali, J. K. Weng

7.74[J] Topics in Biophysics and Physical Biology
Same subject as 8.590[J], 20.416[J]
Prereq: None
G (Fall)
2-0-4 units

See description under subject 20.416[J].
I. Cisse, N. Fakhri, M. Guo
7.76 Topics in Macromolecular Structure and Function
Prereq: Permission of instructor
G (Spring)
Not offered regularly; consult department
3-0-6 units

In-depth analysis and discussion of classic and current literature, with an emphasis on the structure, function, and mechanisms of proteins and other biological macromolecules.
C. Drennan, R. T. Sauer

7.77 Nucleic Acids, Structure, Function, Evolution and Their Interactions with Proteins
Prereq: 7.05, 7.51, or permission of instructor
Acad Year 2017-2018: Not offered
Acad Year 2018-2019: G (Spring)
3-0-9 units

Surveys primary literature, focusing on biochemical, biophysical, genetic, and combinatorial approaches for understanding nucleic acids. Topics include the general properties, functions, and structural motifs of DNA and RNA; RNAs as catalysts and as regulators of gene expression; RNA editing and surveillance, and the interaction of nucleic acids with proteins, such as zinc-finger proteins, modification enzymes, aminoacyl-tRNA synthetases and other proteins of the translational machinery. Includes some lectures but is mostly analysis and discussion of current literature in the context of student presentations.
D. Bartel, U. RajBhandary

7.80 Biological Chemistry II
Subject meets with 5.08[J], 7.08[J]
Prereq: 5.12; 5.07[J] or 7.05
G (Spring)
4-0-8 units

More advanced treatment of biochemical mechanisms that underlie biological processes. Topics include macromolecular machines such as the ribosome, the proteasome, fatty acid synthases as a paradigm for polyketide synthases and non-ribosomal polypeptide synthases, and polymerases. Emphasis is on experimental methods used to unravel these processes and how these processes fit into the cellular context and coordinate regulation. Students taking the graduate version are expected to explore the subject in greater depth.
E. Nolan, R. Raines

7.81[J] Systems Biology
Same subject as 8.591[J]
Subject meets with 7.32
Prereq: 18.03, 18.05; or permission of instructor
G (Fall)
3-0-9 units

See description under subject 8.591[J].
J. Gore

7.82 Topics of Mammalian Development and Genetics
Prereq: Permission of instructor
G (Spring)
3-0-9 units

Seminar covering embryologic, molecular, and genetic approaches to development in mice and humans. Topics include preimplantation development; gastrulation; embryonic stem cells, gene targeting and nuclear reprogramming of somatic cells; genomic imprinting; X-inactivation; sex determination; and germ cells.
R. Jaenisch, R. Young

7.85 The Hallmarks of Cancer
Subject meets with 7.45
Prereq: Permission of instructor; Coreq: 7.06
G (Fall)
4-0-8 units

Provides a comprehensive introduction to the fundamentals of cancer biology and cancer treatment. Topics include cancer genetics, genomics, and epigenetics; familial cancer syndromes; signal transduction, cell cycle control, and apoptosis; cancer metabolism; stem cells and cancer; metastasis; cancer immunology and immunotherapy; conventional and molecularly-targeted therapies; and early detection and prevention. Students taking graduate version complete additional assignments.
T. Jacks, M. Vander Heiden
7.87 Protein Folding and Misfolding in Biology
Prereq: 7.51, 7.52; or permission of instructor
G (Spring)
Not offered regularly; consult department
3-0-6 units

Covers protein folding, misfolding, aggregation, and amyloid formation in the context of biological systems. Addresses topics such as chaperone structure and function, biofilm formation by bacteria, protein-folding diseases (including but not limited to Alzheimer’s, Parkinson’s, and Huntington’s diseases), the process of therapeutics discovery for drugs and biologics. Features guest lectures and Skype discussions with international leaders in the field. Students present papers covering mutually agreed-upon topics of interest.

Staff

7.89[J] Topics in Computational and Systems Biology
Same subject as CSB.100[J]
Prereq: Permission of instructor
G (Fall)
2-0-10 units

See description under subject CSB.100[J]. Preference to first-year CSB PhD students.

C. Burge

7.930[J] Research Experience in Biopharma
Same subject as 20.930[J]
Prereq: None
G (Fall)
2-10-0 units

See description under subject 20.930[J].

S. Clarke

7.931 Independent Study in Biology
Prereq: Permission of instructor
G (Fall, Spring)
Units arranged [P/D/F]
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.932 Independent Study in Biology
Prereq: Permission of instructor
G (Fall, Spring)
Units arranged
Can be repeated for credit.

Program of study or research to be arranged with a department faculty member.

Staff

7.933 Research Rotations in Biology
Prereq: Permission of instructor
G (Fall, Spring)
Units arranged [P/D/F]
Can be repeated for credit.

Introduces students to faculty participating in the Biology graduate program through a series of lab rotations, which provide broad exposure to biology research at MIT. Students select a lab for thesis research by the end of their first year. Limited to students in the Biology graduate program.

Staff

7.934 Teaching Experience in Biology
Prereq: Permission of instructor
G (Fall, Spring)
Units arranged [P/D/F]

For qualified graduate students in the Biology graduate program interested in teaching. Classroom or laboratory teaching under the supervision of a faculty member.

Staff

7.935 Responsible Conduct in Biology
Prereq: Permission of instructor
G (Fall)
Units arranged [P/D/F]

Sessions focus on the responsible conduct of science. Considers recordkeeping and reporting; roles of mentor and mentee; authorship, review, and confidentiality; resolving conflicts; misfeasance and malfeasance; collaborations, competing interests, and intellectual property; and proper practices in the use of animal and human subjects. Limited to second-year graduate students in Biology.

Staff
7.941 Research Problems
Prereq: Permission of instructor
G (Fall, Summer)
Units arranged [P/D/F]
Can be repeated for credit.
Directed research in a field of biological science, but not contributory to graduate thesis.
Consult Biology Education Office

7.942 Research Problems
Prereq: Permission of instructor
G (Spring)
Units arranged [P/D/F]
Can be repeated for credit.
Directed research in a field of biological science, but not contributory to graduate thesis.
Consult Biology Education Office

7.95 Cancer Biology
Prereq: 7.85, permission of instructor
G (Spring)
3-0-9 units
Advanced seminar involving intensive analysis of historical and current developments in cancer biology. Topics address principles of apoptosis, principles of cancer biology, cancer genetics, cancer cell metabolism, tumor immunology, and therapy. Detailed analysis of research literature, including important reports published in recent years. Enrollment limited.
R. Weinberg, O. Yilmaz

7.98[J] Neural Plasticity in Learning and Memory
Same subject as 9.301[J]
Prereq: Permission of instructor
G (Spring)
3-0-6 units
See description under subject 9.301[J]. Juniors and seniors require instructor's permission.
S. Tonegawa, W. Quinn

7.931 Special Subject in Biology
Prereq: Permission of instructor
G (Fall, Spring, Summer)
Units arranged [P/D/F]
Can be repeated for credit.
Covers material in various fields of biology not offered by the regular subjects of instruction.
Staff

7.932 Special Subject in Biology
Prereq: Permission of instructor
G (Fall, IAP, Spring)
Not offered regularly; consult department
Units arranged [P/D/F]
Can be repeated for credit.
Covers material in various fields of biology not offered by the regular subjects of instruction.
Staff

7.939 Special Subject in Biology
Prereq: Permission of instructor
G (Fall, IAP, Spring, Summer)
Not offered regularly; consult department
Units arranged [P/D/F]
Can be repeated for credit.
Covers material in various fields of biology not offered by the regular subjects of instruction.
Staff

7.THG Graduate Biology Thesis
Prereq: Permission of instructor
G (Fall, IAP, Spring, Summer)
Units arranged [P/D/F]
Can be repeated for credit.
Program of research leading to the writing of a Ph.D. thesis; to be arranged by the student and an appropriate MIT faculty member.
Staff
