How to Read Subject Descriptions

A subject description consists of four parts:

• Subject name (p. 4)
• Subject information (p. 4)
• Subject content (p. 5)
• Instructor(s) (p. 5)

Examples:

11.003[J] Methods of Policy Analysis
Same subject as 17.303[J]
Prereq: 11.002[J]; Coreq: 14.01
Acad Year 2018-2019: Not offered
Acad Year 2019-2020: U (Spring)
3-0-9 units. HASS-S

Provides students with an introduction to public policy analysis. Examines various approaches to policy analysis by considering the concepts, tools, and methods used in economics, political science, and other disciplines. Students apply and critique these approaches through case studies of current public policy problems.

Staff

20.110[J] Thermodynamics of Biomolecular Systems
Same subject as 2.772[J]
Prereq: Calculus II (GIR), Chemistry (GIR), and Physics I (GIR)
U (Fall)
5-0-7 units. REST

M. Birnbaum C. Voigt

Subject Name

The subject name consists of its number and title.
Because there are multiple versions of the subjects that satisfy General Institute Requirements (GIRs) in Science, those subjects are identified as GIRs when they appear as prerequisites and corequisites. The subjects that currently fulfill each requirement are listed below:

<table>
<thead>
<tr>
<th>Subject</th>

<tr>
<td>Biology (GIR)</td>
<td>7.012, 7.013, 7.014, 7.015, 7.016</td>

</tr>
<tr>

**Acad Year**
- May indicate “2018–2019: Not offered” or “2019–2020: Not offered.” There is no comment if the subject is offered in both academic years.

**U or G, plus (Fall, IAP, Spring, and/or Summer)**
- Indicates a subject’s level and the terms in which it is offered. U denotes an undergraduate subject; G denotes a graduate subject. IAP is MIT’s Independent Activities Period, which takes place in January.

**#-#-# units or Units arranged**
- Credit units (hours) indicate the total amount of time spent in class and laboratory, plus the estimated time that the average student spends on outside preparation, for one regular term subject. Credit hours are represented by three numbers separated by dashes (for example, 3-3-6). First is the number of units assigned for class time (lecture and/or recitation); second, the number of units for laboratory, design, or fieldwork; and third, the number of units for preparation. Each unit represents about 14 hours of work per term, or about one hour of work per week for a subject that spans an entire term. The total unit credit for a subject is obtained by adding together all the units shown. Units arranged indicates that units are specially arranged with the instructor.

**BIOLOGY, PHYSICS I and II, etc.**
- Subjects that fulfill the General Institute Requirements, such as BIOLOGY, PHYSICS I and II, CALCULUS I and II, CHEMISTRY, REST (Restricted Electives in Science and Technology), Institute LAB, Partial LAB, or HASS (Humanities, Arts, and Social Sciences) are so designated to the right of the credit units.

**HASS-H, etc.**
- Subjects that fulfill the HASS Requirement are designated HASS-H (Humanities), HASS-A (Arts), HASS-S (Social Sciences), or HASS-E (Elective).

**CI-H or CI-HW**
- Subjects fulfilling HASS component of the Communication Requirement are designated CI-H or CI-HW. See degree charts to identify communication-intensive subjects in each major (CI-M).

**P/D/F**
- Appears to the right of the credit units if the subject is graded on a P, D, or F basis (where P means C or better performance).

**Can be repeated for credit**
- Appears under the credit units if the subject can be taken more than once for academic credit.
