

JOINT PROGRAM WITH WOODS HOLE OCEANOGRAPHIC INSTITUTION

Applied Ocean Science and Engineering

Applied ocean science and engineering involves the application of physics and the engineering sciences to the study of oceanic processes and the design of instruments, systems, and structures required to observe, measure, and work in the ocean. The Departments of Aeronautics and Astronautics, Civil and Environmental Engineering, Electrical Engineering and Computer Science, and Mechanical Engineering offer joint programs with WHOI in oceanographic engineering. The programs lead to the Master of Science, Engineer, Doctor of Science, or Doctor of Philosophy degree.
