

GRADUATION

Degrees are awarded by the Corporation of the Institute in September, February, and May upon recommendation of the Faculty. Favorable faculty action is based upon approval by the Committee on Academic Performance or the Committee on Graduate Programs on recommendations from departmental committees.

Students must submit an online SB degree application or advanced degree application by the deadline for each regular term or the summer session, as established in the academic calendar. A degree will not be awarded unless all financial obligations to the Institute are clear and there are no pending disciplinary actions.

More information about graduation (<http://registrar.mit.edu/graduation>) is available on the Registrar's website.
