

DEPARTMENT OF ARCHITECTURE

Undergraduate Study

The Department of Architecture offers two undergraduate courses of study. They provide a broad undergraduate education for students who have clear professional goals and for those who desire a solid foundation for a number of possible careers. Course 4 leads to the Bachelor of Science in Architecture and Course 4-B leads to the Bachelor of Science in Art and Design.

Bachelor of Science in Architecture (Course 4)

Course 4 (<http://catalog.mit.edu/degree-charts/architecture-course-4>) offers a program introducing students to architecture through the department's five discipline areas: art, culture and technology; architectural design and urbanism; building technology; design and computation; and history, theory and criticism of architecture, art and design.

The requirements for the SB in Architecture (BSA) (<http://catalog.mit.edu/degree-charts/architecture-course-4>) curriculum begin with two introductory subjects taken in sequence, 4.021 Design Studio: How to Design and 4.022 Design Studio: Introduction to Design Techniques and Technologies, intended for sophomores. The remaining core subjects include introductory study in the five discipline areas.

The BSA includes two or three sequential architecture design studios. The approach fosters investigation and discussion in the development of sensitivity to the built environment. These sensibilities are linked to values and responsibilities to the community at large. Students in design studios develop technical and analytical skills and learn synthesis and invention using the elements of architectural form: material, structure, construction, light, sound, memory, and place. A thesis is optional and taken during the senior year.

This program prepares students for future studies in a professional Master of Architecture (MArch) program.

Bachelor of Science in Art and Design (Course 4-B)

The Bachelor of Science in Art and Design (BSAD) (<http://catalog.mit.edu/degree-charts/architecture-course-4-b>) provides undergraduates with a cohesive program of study that exposes them to cross-disciplinary fields in art and design. It provides a rigorous conceptual foundation along with strong practical skills that can be applied across diverse design domains. Students will be introduced to the design process, from concept to completion, through contextual critical thinking, experimentation, representation, and physical production techniques, critique, iteration, and reflection. The objective is to prepare students to pursue diverse career paths from product design to visual communication to information design to 2D and 3D art practices and more. Study in this program will

enable students to take advantage of emerging opportunities in industry and academia.

The requirements for the BSAD curriculum begin with two introductory subjects taken in sequence, 4.021 Design Studio: How to Design and 4.022 Design Studio: Introduction to Design Techniques and Technologies, intended for sophomores. A choice of a third design studio is taken in the junior year along with four additional core foundational subjects in design, art, computation, and history. The remaining four requirements are selected from a list of interdisciplinary subject offerings grouped around the following themes: objects, information, and art and experience. A thesis preparation subject is required and a thesis is presented in the senior year.
